NU PRO AEROSOL 330ML
COO-CRA810080

A rapid acting total release aerosol for space fumigation of residential buildings, stores, warehouses, mills, silos, ships, etc.

Guaranteed dramatic reduction in adult pest population - visible results
Highly penetrative aerosol for space fumigation
No specialised equipment required
Easy to use total release can
No residues left after 6 hrs fumigation period
Organophosphate - quick knockdown properties
Two tin sizes for easy and practical use

Reg. No. L7410 Act No. 36 of 1947
Namibian Reg. No. N-AR 0853
Botswana Reg. No. W130258

ACTIVE INGREDIENT:

Dichlorvos (organophosphate) 124g/kg **HARMFUL**

FOR USE IN:

- Commercial and Industrial Premises
- Warehouses
- Archives
- Ships
- Stores
- Museums
- Silos
- Residential Buildings
- Fast Food Outlets
- Mills
- Storerooms

CONTROLS: Moths, flies, mosquitoes, grain beetles and larvae, flour beetles and larvae, weevils and larvae, cockroaches, fishmoths, mites, lice, fleas, crickets, bedbugs and carpet beetles

PACKAGING: 24x330ml, 12x330ml and 12x120ml total release aerosol can

DIRECTIONS FOR USE: USE ONLY AS DIRECTED
(Refer to product label for full particulars)

Insecticides

DOOM FOGGER 350ML
POI-FOG001
Doom Fogger Dual Action Insecticide 350ml kills large infestations of cockroaches, weevils, fleas, ants, gnats, spiders, crickets and bedbugs on contact. It can be used throughout your house and works by filling large areas with a fine fog.

RAID INSECT KILLER
5 X 10 COILS
A.1 RAID 06
Kills and repels mosquitoes all night long.
Pack sizes
5 X 10 coils

VASTRAP FLY RIBBON
24 X 4
POI-VASF001
Ribbon can be used everywhere where there is a fly problem, in the home, outhouses, in attics, garages, caravans, etc. The ribbon is easy to use and can be hung under any rain protected area.

VASTRAP FLYING INSECT TRAP
SELF STANDING - 260 X 36MM
POI-VASFIT001
A safe and easy way to control flying insects.
Pack sizes
260 X 36mm

ULTRAKILL FLY BAIT 500G

COO-FLY410344

An attractive bait for the control of houseflies in and around animal housing, refuse tips, manure heaps and food handling plants.

Pheromone enhanced fly bait to attract and control house flies
Four easy application methods to suit each situation
Can be used as wet or dry bait, paint-on or spray
Fast and visible knock down action
Strong bittering agent to discourage accidental consumption by humans or pets, without affecting fly attraction

Reg. No. L4578 Act No. 36 of 1947
Namibian Reg. No. N-AR 0421

ACTIVE INGREDIENT:

Methomyl (carbamate) 10g/kg **CAUTION**
Tricosene 0,50g/kg

FOR USE IN:

- Homes
- Animal Housing
- Manure heaps
- Refuse tips
- Dustbins
- Compost heaps
- Outdoor food handling plants

CONTROLS: Flies

PACKAGING: 50g sachet, 100g shaker, 500g shaker, 1kg, 5kg and 20kg bucket

DIRECTIONS FOR USE: USE ONLY AS DIRECTED
(Refer to product label for full particulars)

PEST	DOSAGE AND APPLICATION
HOUSE FLY	Dry bait: Place bait in suitable shallow containers out of reach of children and animals in areas where flies usually congregate.
	Scatter bait: Scatter bait at the rate of 300g/50 - 100m ² in and around animal housing in areas inaccessible to animals and on refuse tips or manure heaps.
	Stick-on method: Where bait cannot be adequately distributed, coat ceiling tiles or a similar light board with egg white or other adhesive and lightly sprinkle bait over. Suspend boards from the roof over of reach of animals.
	Liquid bait: As a paint-on bait, mix one part bait with one part water and apply by paint brush or roller. Bait can be applied to any surface out of reach of people and animals where flies congregate.
	Sprinkle bait: Dissolve 500 - 1000g/10L of water. Apply by sprinkling onto floors or sprayed as a spot treatment to areas frequented by flies. Repeat treatment 2-3 day intervals.

Insecticides

DOOM BLUE DEATH
100GRAMS
POI-BLU001

Effectively kills garden and household insects on contact.

Pack size

VASTRAP ROACH HUNTER
5 PER PACK
POI-VAST001

Easy to use
Disposable
Safe
No chemical poisons
Effective
Once in never out

NO ROACH PESTICIDE 25 SC -
100ML
EFE-10152

A pyrethroid insecticide as a suspension concentrate for the control of household insects. Controls Cockroaches and bedbugs in dwellings, animal houses and industrial premises.

ULTRAKILL WETTABLE
POWDER 25G
COO-FLY810362

A long lasting wettable powder insecticide for the control of flying and crawling insect pests.

ULTRAKILL ROACHFORCE GEL 10G
COO-CRA810358

Gel bait for the control of cockroaches (nymphs and adults) in public hygiene, domestic premises and food storage premises, which is non-repellant, odourless and non-volatile.

Internationally acclaimed bait matrix has irresistible attraction and palatability features
Powerful "knock-on" effect - Kills beyond only those that ate the bait
New formulation gel bait for the control of adult and nymph cockroaches alike
Non-repellent, non-volatile with attraction aroma
Remains moist for longer - Effective even if it should harden

Reg. No. L8652 Act No. 36 of 1947
Namibian Reg. No. N-AR 1248

ACTIVE INGREDIENT:

Hydramethylnon 20g/kg **CAUTION**

FOR USE IN:

- Domestic
- Industrial
- Food storage premises

CONTROLS: Cockroaches - American, German and Oriental (adult and nymph)

PACKAGING: 20g easy apply tube and 35g syringe

DIRECTIONS FOR USE: USE ONLY AS DIRECTED
(Refer to product leaflet for full particulars)

PEST	DOSAGE AND APPLICATION
ORIENTAL COCKROACHES	0,50 - 1,00g/m ² . A 24mm strip of gel (5mm in diameter) has a mass of approximately 0,5g.
AMERICAN COCKROACHES	0,50 - 1,00g/m ² . A 24mm strip of gel (5mm in diameter) has a mass of approximately 0,5g.
GERMAN COCKROACHES	0,25 - 0,50g/m ² . A 24mm strip of gel (5mm in diameter) has a mass of approximately 0,5g. A number of smaller placements will prove to be more effective than a few larger spots, especially for German cockroaches.

Insecticides

■ ANTRAP - 2PACK

EFE-20528

AnTrap comes in easy-to-use, pre-filled gel ant bait stations. Ants enter the trap, consume the bait, then return to the nest where they pass on the bait to the rest of the colony.

Features

Kills ants and the nests Contains two bait stations per pack Is clean and easy to use

■ ANTRAP INDOORS - 2PACK

EFE-34776

AnTrap comes in easy-to-use, pre-filled gel ant bait stations. Ants enter the trap, consume the bait, then return to the nest where they pass on the bait to the rest of the colony.

Features

Kills ants and the nests Contains two bait stations per pack Is clean and easy to use

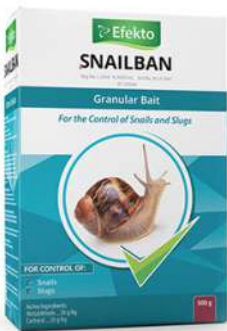

■ ANT INSECTICIDE - 100ML

EFE-20531

A pyrethroid insecticide as an emulsifiable concentrate for the control of ants and household insects as listed.

Features

A contact insecticide for control of ants inside and outside the home. Added synergist for quick knockdown. Effective against most indoor pests.

■ SNAILBAN M - 1KG BAG

EFE-10514

A granular bait for the control of snails and slugs.

Features

Ready to use pellets – apply straight from the pack. Economical control of snails and slugs.

■ Pack sizes

1kg

■ FENDONA 6 SC - 50ML

EFE-16965

A Long lasting suspension concentrate contact and stomach insecticide for the control of flies, cockroaches (American and German), Bed-bugs, Fleas, Fishmoths, mosquitoes, Hide Beetles and Larvae, Stableflies, ants and Alphetobius Larvae and Beetles.

■ ULTRAKILL ANT FORCE 100G

COO-CRA810285

Granular bait for the indoor or outdoor control of ants (including brown house ant and black sugar ant), outdoors around domestic premises and buildings, on lawns turf grass and other areas such as parks and golf courses.

Insecticides

■ FLYZONE REUSABLE TRAP POI-FLYZ001

The Flyzone catches common nuisance or filth flies – hundreds of the most prevalent species including house flies, false stable flies, blow flies, blue and green bottle flies, flesh flies, face flies and many others. Inside the Flyzone is a bait that flies find irresistible. This attractant is comprised of food ingredients and other food flavorings generally recognized as safe. The attractant dissolves and is activated, when water is added to the bag. Lured by the scent, flies enter the trap through the yellow top cap and drown in the water.

■ FLYZONE DISPOSABLE TRAP POI-FLYZ002

■ FLYZONE BAIT AND BAG POI-FLYZ003

■ FLYZONE BAIT POI-FLYZ004

1. Preparation:

Clip the mesh together to form a cone as illustrated.

1A. Make sure the clips face inwards.

2. Add the Flyzone attractant bait:

Empty the Flyzone attractant bait into the bag. Add 1 Litre of luke warm water and mix by squashing the mixture with your fingers on the outside of the bag.

3. Assembly:

Place the assembled mesh cone into the round hole on top of the Flyzone dish until it clips into place. Clip the rain cover into the small hole on top of the Flyzone dish.

4. Placement of Flyzone Fly Trap:

Hang the Flyzone Fly Trap at least 2 meters above the ground and at least 5 meters away from fly infestation / problem areas.

Hang the Flyzone between fly infestation and living area and not closer than 15 meters from living area. The Flyzone works best when hung in direct sunlight in warmer climates.

The Flyzone Flytrap will take between 2 and 4 days to be fully operational, depending on climatic conditions.

5. Maintenance:

Check the Flyzone water level weekly and add water when necessary. Insufficient water will reduce the efficiency of the trap.

6. Disposal:

Puncture the bag with a sharp instrument and empty contents into a hole in the garden or compost heap. Alternatively, empty into the toilet and flush away. The bag can also be placed into a used shopping bag and disposed of in the refuse / garbage bin.

Note:

To ensure a fly free zone, a fresh Flyzone Flytrap should be placed at least 3 - 4 days prior to the used full Flyzone Flytrap being serviced or replaced.

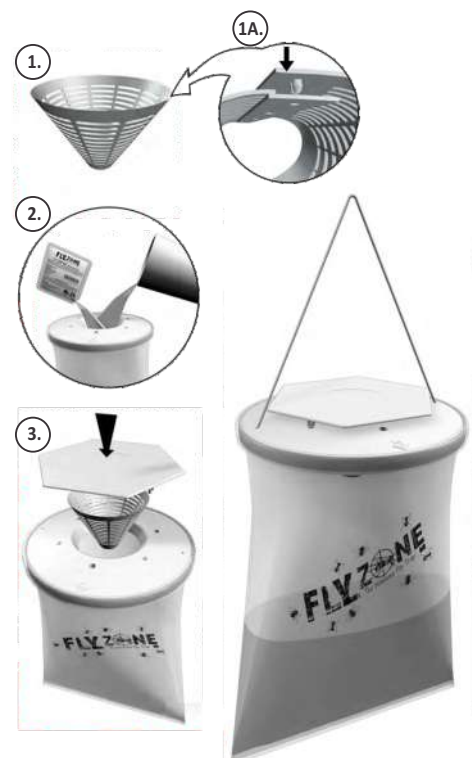

WARNING

Flies carry diseases and germs (pathogens). Keep activated Flyzone fly trap out of reach of children, pets and livestock.

Wash hands after use.

Rodent Pest Control

■ SUPA KILL RAT & MOUSE - 100G GRANULAR

EFE-31527
A highly active anticoagulant ready-to-use grain bait for the control of Rats and Mice.
Features
Controls Norway Rats
Roof rats
House mice

■ DOOM RATTEX DEADLY PELLETS - 100G

POI-RAT001
Kills rats and mice.
■ Pack size
100GRM

■ BAYER FINALE POI-FIN001

A highly active single feed bait to control NORWAY RATS and ROOF RATS and HOUSE MOUSE in normal in-premises locations, protected from weather or dampness.
■ Pack size
50GRM

Rats and mice destroy billions in food products per year, spread bacteria and leave associated filth in food and feed supplies. Reducing stress on food animals and damage to crops by effectively reducing the adverse effects of rodents and the dangerous pathogens they carry has a significant impact on the subsequent safety and quality of food and animal health.

■ ULTRAKILL RAT & MOUSE WAX BLOCKS 500G COO-ROD5100001

■ ULTRAKILL RAT & MOUSE WAX BLOCKS 85G COO-ROD5100000

A highly active anticoagulant wax blocks for the control of the Norway Rat (*Rattus norvegicus*), Roof Rat (*Rattus rattus*) and House Mouse (*Mus musculus*).

Powerful anticoagulant rodenticide effective against even resistant rats and mice
Multi-edged form encourages rodents natural need to gnaw and uptake of bait
Controls the Norway rat, Roof rat and House mouse
Easy placement on beams, roof trusses and in damp areas
For indoor and outdoor use - wax block is the ideal, hardy formulation for any outdoor situation
Longer center hole for easy attachment to bait station rods
Contains **Bitrex®** - a human taste deterrent

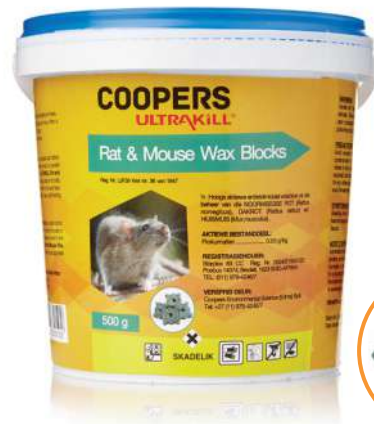

Reg. No. L9739 Act No. 36 of 1947

ACTIVE INGREDIENT:

Flocoumafen (anticoagulant) 0,05g/kg **HARMFUL**

FOR USE IN:

- Domestic
- Industrial
- Public health markets
- Farms
- Stored Product Facilities
- Damp areas

Rat

Mouse

Wax Blocks

CONTROLS: Norway rat (*Rattus norvegicus*), Roof rat (*Rattus rattus*) and House Mouse (*Mus musculus*)

PACKAGING: 20x85g, 12x500g, 2.5kg and 10kg buckets

DIRECTIONS FOR USE: USE ONLY AS DIRECTED
(Refer to product label for full particulars)

PEST	DOSAGE AND APPLICATION
RATS	Place 3-4 ULTRAKILL Rat and Mouse Wax Blocks per bait station every 5-10m along walls or rat trails, in rat burrows and sheltered areas where rats are known to live and feed. Bait points should be inspected and replenished every 7 days until feeding ceases.
MICE	Place 2-4 ULTRAKILL Rat and Mouse Wax Blocks per bait station every 2-4m along walls or runways, in nests and in sheltered areas where mice are known to live and feed. The single feed action of ULTRAKILL Rat and Mouse Wax Blocks is particularly effective against mice with their small appetites and sporadic feeding habits.

Bait Station

Place **ULTRAKILL RAT and Mouse Wax Blocks** in a suitable bait station such as the **Coopers Coral Bait Station** or a similar model to prevent access by children and domestic animals.

Pesticide Control

Rodent Pest Control

■ ULTRAKILL RAT & MOUSE PELLETS 500G COO-ROD5100022

■ ULTRAKILL RAT & MOUSE PELLETS 50G COO-ROD5100020

A highly active anticoagulant bait for the control of the Norway Rat (*Rattus norvegicus*), Roof Rat (*Rattus rattus*) and House Mouse (*Mus musculus*).

- ▶ Most attractive presentation form of the different rodenticides available
- ▶ Powerful anticoagulant rodenticide effective against even resistant rats and mice
- ▶ Effectively controls the Norway rat, Roof rat and House mouse
- ▶ Attractive presentation, shape and length promotes rodents natural preference to hold the pellet in front paws while eating.
- ▶ Can be used in many of the standard rat bait boxes
- ▶ Contains **Bitrex**[®] - a human taste deterrent
- ▶ New bait matrix, specially formulated to promote acceptability and consumption

Rat

Mouse

Pellets

Reg. No. L9322 Act No. 36 of 1947

ACTIVE INGREDIENT:

Flocoumafen (anticoagulant) 0,05g/kg **HARMFUL**

FOR USE IN:

- Domestic
- Industrial
- Public health markets
- Farms
- Stored Product Facilities

CONTROLS: Norway rat (*Rattus norvegicus*), Roof rat (*Rattus rattus*) and House Mouse (*Mus musculus*)

PACKAGING: 30x50g, 12x200g, 12x500g and 5kg buckets

DIRECTIONS FOR USE: USE ONLY AS DIRECTED
(Refer to product label for full particulars)

PEST	DOSAGE AND APPLICATION
RATS	Place 50-75g ULTRAKILL Rat and Mouse Pellets per bait station every 5-10m along walls or rat trails, in rat burrows and sheltered areas where rats are known to live and feed. Bait points should be inspected and replenished every 7 days until feeding ceases.
MICE	Place 15-20g ULTRAKILL Rat and Mouse Pellets per bait station every 2-4m along walls or runways, in nests and in sheltered areas where mice are known to live and feed. The single feed action of ULTRAKILL Rat and Mouse Pellets is particularly effective against mice with their small appetites and sporadic feeding habits.

Place **ULTRAKILL RAT and Mouse Pellets** in a suitable bait station such as the **Coopers Coral Bait Station** or a similar model to prevent access by children and domestic animals.

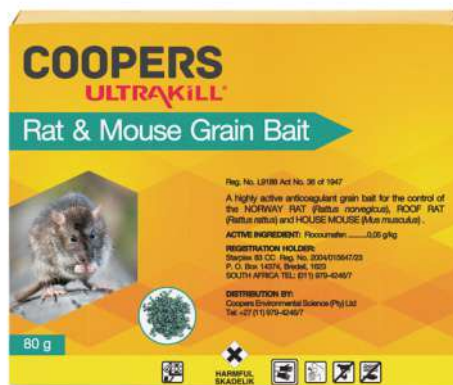

Bait Station

Rodent Pest Control

■ ULTRAKILL RAT & MOUSE GRAIN BAIT 200G COO-ROD5100031

A highly active anticoagulant grain bait for the control of the Norway Rat (*Rattus norvegicus*), Roof Rat (*Rattus rattus*) and House Mouse (*Mus musculus*).

- ▶ Powerful anticoagulant rodenticide effective against even resistant rats and mice
- ▶ For use in large scale rodent control programmes
- ▶ Controls the Norway rat, Roof rat and House mouse
- ▶ New formulating method used to improve standard adhesion levels on grain by greater absorption of active ingredients
- ▶ Can be used in many of the standard rat bait boxes
- ▶ Based on grain which is the preferred food source for rats and mice
- ▶ Contains **Bitrex**[®] - a deterrent for human and pet

Reg. No. L9188 Act No. 36 of 1947

ACTIVE INGREDIENT:

Flocoumafen (anticoagulant) 0,05g/kg **HARMFUL**

FOR USE IN:

- Domestic
- Industrial
- Public health markets
- Farms
- Large scale programmes

CONTROLS: Norway rat (*Rattus norvegicus*), Roof rat (*Rattus rattus*) and House Mouse (*Mus musculus*)

PACKAGING: 4x6x80g, 12x200g, 12x500g and 4x2.5kg buckets

DIRECTIONS FOR USE: USE ONLY AS DIRECTED
(Refer to product label for full particulars)

PEST	DOSAGE AND APPLICATION
RATS	Place 50-75g ULTRAKILL Rat and Mouse Grain Bait per bait station every 5-10m along walls or rat trails, in rat burrows and sheltered areas where rats are known to live and feed. Bait points should be inspected and replenished every 7 days until feeding ceases.
MICE	Place 15-20g ULTRAKILL Rat and Mouse Grain Bait per bait station every 2-4m along walls or runways, in nests and in sheltered areas where mice are known to live and feed. The single feed action of ULTRAKILL Rat and Mouse Grain Bait is particularly effective against mice with their small appetites and sporadic feeding habits.

Place **ULTRAKILL RAT and Mouse Grain Bait** in a suitable bait station such as the **Coopers Coral Bait Station** or a similar model to prevent access by children and domestic animals.

Rodent Pest Control

COOPERS ADVANCE PASTE 200G COO-ROD5100040

A highly active anticoagulant ready-for-use paste bait for the control of rats and mice in the domestic, industrial and public health markets.

- ▶ **Dual purpose** - food and liquid source
- ▶ **Highly palatable bait matrix**, rich in proteins and fats, with alluring aroma.
- ▶ Specially formulated to stay **fresher** for longer
- ▶ **Ready-to-use** sachet takes the hassle out of handling
- ▶ Active ingredient with proven lower risk of secondary poisoning to owls

Rat

Mouse

Paste

Reg. No. L9087 Act No. 36 of 1947

ACTIVE INGREDIENT:

Difenacoum (anticoagulant) 0,05g/kg **HARMFUL**

FOR USE IN:

- Domestic situations with pets or where owls have been spotted
- Industrial
- Public health sectors

CONTROLS: Norway rat (*Rattus norvegicus*), Roof rat (*Rattus rattus*) and House Mouse (*Mus musculus*)

PACKAGING: 200g bag

DIRECTIONS FOR USE: USE ONLY AS DIRECTED
(Refer to product label for full particulars)

PEST	DOSAGE AND APPLICATION
PREPARATION FOR BAIT	Before placing ADVANCED PASTE , inspect the infested site thoroughly to determine the location of all rat and mouse entry points, nesting and feeding sites. The bait should be placed in a suitable bait station such as Coopers Coral Bait Station to prevent access by birds and domestic pets, and to prevent the bait becoming unpalatable. Rodents feel more secure when feeding under cover.
RATS	Place up to 200g of bait at each bait point. Inspect bait frequently particularly in the first ten days and replace partly consumed bait. If a bait point is completely consumed, the quantity should be increased. Continue replenishing baits until they are left untouched.
MICE	Place up to 30g of ADVANCED PASTE one to two meters apart in areas where activity is obvious, particularly where droppings damage or any other signs of activity are seen.

Bait Station

Place **Advanced Paste** in a suitable bait station such as the **Coopers Coral Bait Station** or a similar model to prevent access by children and domestic animals.

House Moth

ULTRAMATIC AEROSOL FLY AND MOSQUITO KILLER 270ML COO-FLY810239

A measured dose space spray aerosol for the control of flying insects such as flies, mosquitoes and moths.

- ▶ Made from a natural plant extract called pyrethrin registered for use in kitchens, living spaces and food handling areas.
- ▶ Controls flying insects in an area up to 180m³ (e.g. 10 x 6 x 3m)
- ▶ 1 month minimum control* when used at a standard setting
- ▶ Ideal for use with the Coopers Ultramatic Aerosol Dispensers for increased efficacy and controlled release
- ▶ Highly concentrated, equivalent to 18 tins of standard aerosols
- ▶ Measured dose - only releases a single spray on button depression

Reg. No. L8409 Act No. 36 of 1947
Namibian Reg. No. N-AR 1247

ACTIVE INGREDIENT:

Pyrethrins 15g/kg
Piperonyl butoxide 150g/kg

Measured Dose Aerosol

FOR USE IN:

- Homes
- Restaurants
- Bakeries
- Commercial and industrial premises
- Schools
- Food preparation areas
- Hospitals
- Restaurants
- Barracks

CONTROLS: Flies, mosquitoes and moths

PACKAGING: 270ml aerosol can

DIRECTIONS FOR USE: USE ONLY AS DIRECTED
(Refer to product label for full particulars)

CAUTION

PEST	DOSAGE AND APPLICATION
FLIES AND MOSQUITOES	Space spray for use with an automatic aerosol machine such as the ULTRAMATIC DISPENSER . When set to operate every 15 minutes, a 270ml can will last approximately 720 hours(30 days). Controls flying insects such as flies, mosquitoes and moths under continuous operation. One unit controls up to 180m ³ . Unit should be positioned to spray away from any surface (approximately 1,5m or at one arms length above head).

*When used according to above recommendation.

ULTRAMATIC AEROSOL ECO DISPENSER COO-FLY810160

The Ultramatic Eco dispenser is a high quality, affordable, basic aerosol dispensing unit. The Ultramatic Eco provides the best basic space spray treatment option available on the market.

- ▶ High quality and durable, chemical resistant plastic - suitable for both insecticides and air fresheners, which is a **great advantage and not commonly found**
- ▶ Three spray settings - 7.5min, 15min or 30min (Default setting is 15min)
- ▶ Manual "ON/OFF" Switch - Can be used whenever needed
- ▶ Test Switch - For testing the batteries and aerosol can
- ▶ Low can indicator - Blinking Green Light-emitting diode (LED)
- ▶ Operates on 2 'D' alkaline batteries (lasts longer than 6 months)

Bait Traps

BAIT STATION MULTI TRAP COO-ROD810231

- ▶ Dual purpose for insect catchment and live mouse trapping.
- ▶ See through lid allows for quick inspection.
- ▶ Unique design facilitates multiple live trapping of mice where rodenticides are not desired.
- ▶ Does not hurt or kill mice.
- ▶ Openings on the perimeter allows for easy insect entry e.g. cockroaches, ants, beetles etc.
- ▶ Glueboards are required for catching insects and are supplied separately

Specifications: 55mm X 270mm X 170mm

Unique design for multiple live mice trapping: As a mouse walks into the trap, ramp (A) is pressed down and flap (B) lifts closing the entire entry point (C). After the mouse has stepped off ramp and into the unit (D), the ramp reverts to original position allowing for multiple live trapping.

BAIT STATION ALPHA COO-ROD810235

- ▶ For Rats and Mice
- ▶ Tamper resistant lockable
- ▶ Ideal for point of entry onto property, perimeter treatment
- ▶ Economical due to scale of quantity required for outer perimeter treatment
- ▶ Contains a rod for wax blocks. Built in tray for various bait formulations (liquid bait, grain bait or pellets)

Specifications: 95mm X 105mm X 240mm

What's Unique: Suitable for placement between narrow spaces such as building material, pipes, pallets, narrow runs etc.

BAIT STATION BETA 2 COO-ROD810232

- ▶ For Rats and Mice
- ▶ Tamper resistant lockable and wall mounted (with supplied bracket)
- ▶ Ideal for use where space is limited (passages, narrow spaces, etc)
- ▶ Contains a rod for wax blocks. Removable tray for various bait formulations (liquid bait, grain bait or pellets)

Specifications: 95mm X 190mm X 230mm

- ▶ **What's Unique:** Lid and tray can be removed for quick access and cleaning.
